

TAX EXEMPTION MANAGEMENT TO YOUR WHOLESALE RESELLERS

CSI manages and maintains your wholesale and enterprise customers' exemption status information monthly.

We reach out to your wholesale and enterprise customers with a detailed exemption package with Federal and State exemption documentation. We are available to support your wholesale resellers with questions and concerns. We help them understand specific issues and assist them in keeping you in compliance.

We provide a monthly status report to maintain most recent tax exemption information concerning your carrier and wholesale customers. This is done through the USAC website which has the most active and current Federal USF contributor status. This report becomes the input record to your billing exemption process.
