

STATE REGISTRATION SERVICES

Compliance Solutions will register your company with the Secretary of State (SOS), Department of Revenue (DOR) and Public Utility Commissions (PUC).

For SOS qualifications CSI will research your company in each state in order to prepare a customized tracking log for your client profile. Based on the tracking log we file and pay your annual Secretary of State filings. Our strategic relationship with Corporation Service Company (CSC) provides the physical address and representation at a much lower price than the average rate in the industry while getting the superior services of CSI and CSC.

The DOR registration service includes working with the individual state departments to obtain the necessary tax account credentials. Registering with the DOR is required to remit transaction tax billed to your customers. We have a secure internal database to store all of your online IDs, passwords and tax account numbers. Your tax account numbers can then easily become accessible for CSI to provide to your underlying carriers for tax exemption forms.

For PUC registrations CSI will research your company in each state in order to determine the necessary registrations with each agency and administrator. We will reach out to the State USF's and register based on the services you provide. We store all the on-line ID numbers and passwords in a secure database.

FEATURES
