

AUDIT DEFENSE SERVICE

Failing a compliance audit can cause all sorts of problems for your business. It can hurt your brand, cost you business, see you fined, or even force your business to shut down.

Compliance Solutions Inc. (CSI) has an experienced team of CPAs and Tax industry experts which are dedicated to handle the defense of our client's Local, State and Federal Tax and Regulatory Audits.

Our team conducts an initial in-depth Review and Risk Assessment to determine and better manage any potential tax liabilities which usually result in reduced tax liabilities for our clients.

CSI's service includes all communications with the auditor, usually at our offices. We keep the audit moving while your staff attends to day-to-day business, minimizing disruption, interpreting auditors requests and tackling any technical challenges that arise.
