

TAX RATING SERVICE

The United States has over 30,000 sales and telecom tax jurisdictions today which are constantly increasing in both frequency and complexity.

As these tax legislations and rates continue to change, it's inevitable that businesses will need to secure a reliable and accurate taxing solution for all your client billing and tax compliance needs.

CSI's tax rating engine, along with its internal research department ensure consistent, compliant and accurate tax calculations.

By thoroughly analyzing a client's products and services we identify all the different tax scenarios and variations which are specific to your business operations for more accurate calculations which result in better tax reporting.

This service, along with our Operational Team supports client internal billing systems, third party software or online billing services to include Real Time Point-of Sales.
